

E/Z Up Treestand Pulley System Instructions

To install/use this product, certain precautions must be taken and manufacturers instructions must be STRICTLY followed.

1. Assemble product as shown in Fig. 1.
2. Install your climbing sticks, steps or other item to reach the desired height for your treestand placement. * **Be sure to follow all ladder/step manufacturers instructions in order to reduce the chance of injury or death.**

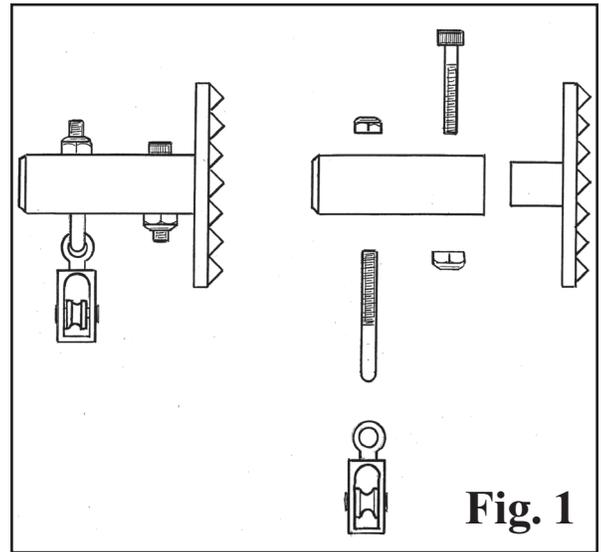

Fig. 1

WARNING: Always wear a full body fall arrest system/full body harness and remain securely attached to the tree at all times while using this product.

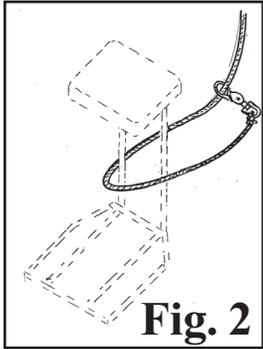

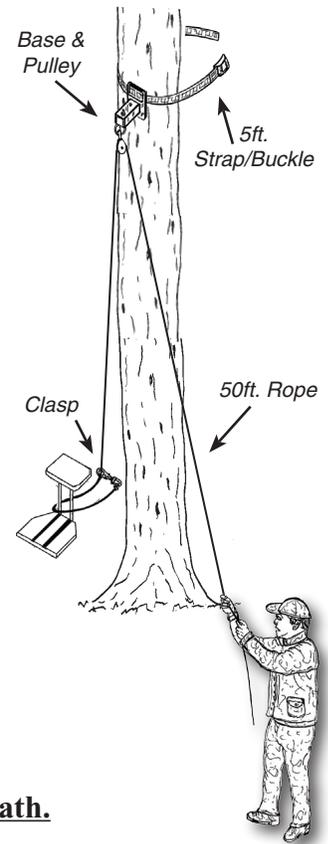

Fig. 2

3. Once you are at your desired height, install E/Z Up Treestand Pulley base at eye level. Do this by wrapping the strap around tree and securing with buckle.
4. Once base is in place, attach treestand to clasp end of the rope. Do this by wrapping the rope and clasp around the treestand vertical upright support(s) and clip the clasp onto the rope. (See Fig. 2)

5. Hoist Treestand into position and secure rope to a nearby live tree, or other secure/solid object.

WARNING: Never stand directly below the treestand at any time while it is off the ground. Plus, never use this product with any object over 25 lbs.

6. Once the pulley rope is secured, attach the treestand to the tree in the correct position. Once treestand is secured, remove pulley and base. * **Be sure to follow all treestand manufacturers instructions in order to reduce the chance of injury or death.**

WARNING: Failure to follow these instructions can cause serious injury or death. Always inspect every part of this product prior to each use to insure proper working order. Never leave base in tree for more than two (2) weeks at a time. Replace rope and strap after 3 years. If you have any questions about the proper use of this product, **STOP**. Call toll-free (877) 746-7434. Never use this product while under the influence of drugs or alcohol.

We strongly recommend the following knot for attaching the clasp to the pulley rope.
